

Code-

```
db.books.find({  
  status: "active"  
}).count()
```

Output-

```
> db.books.find({  
  status: "active"  
}).count()  
< 2  
test>
```

The screenshot shows a MongoDB shell interface. The first part is a dark blue terminal window with the command `> db.books.find({ status: "active" }).count()` entered. Below the command, the output `< 2` is displayed in blue. The second part is a lighter blue terminal window with the prompt `test>`.
